Intended use:

The KNX ENO 626 secure device serves as a bidirectional gateway between EnOcean wireless devices and the KNX bus. With this device, commands and measured values from EnOcean wireless sensors can be transmitted to the KNX bus, for example to control KNX actuators. EnOcean wireless actuators can also be controlled via KNX. The KNX ENO 626 secure from Weinzierl supports the encrypted wireless communication with security-enabled EnOcean devices.
