

KNX RF / ENO Window Sensor 490 *secure*

Test template

This flyer shows the actual size of the window sensor.

Cut out the template and hold it up to your installation location to check whether the sensor fits your window.

1

Cut out

Cut along the dotted line following the outline.

2

Hold

Hold the cut out template against the window frame.

3

Check

Make sure the window sensor can be taped in place here and that it does not block any moving parts.

Printing instructions

When printing, please make sure to use the correct print settings.

Print this flyer only in its original size, or **actual size**.

Do not adjust it to fit the page size or **scale it**!
